ANNOUNCEMENT

WORKSHOP on High-pressure mineral physics and magmatic petrology at the Laboratoire Magmas et Volcans (LMV), Clermont Ferrand, France

This inaugural workshop aims at introducing **high-pressure research** to master and Ph.D. students covering various fields of science, including Earth and planetary sciences, materials science, physics, and chemistry.

The participants will gain familiarity with available state-of-the-art methods and how they can be applied to their research.

The workshop comprises lectures covering the **basic principles of high-pressure** mineral physics and magmatic petrology and hands-on training on high-pressure techniques (piston cylinder, multi-anvil, and diamond anvil cell), in situ measurements (electrical conductivity, thermal conductivity, and elastic wave velocity), and sample characterization techniques (EPMA, Raman, FTIR, SEM-FIB)

18 - 22
SEPTEMBER
2023

APPLICATION :

- By email to geeth.manthilake@uca.fr
- Applicants are invited to send their application with a **CV**, and a short description of their background, current position, and motivation to apply to the workshop (**max 1 page**).

SELECTION :

- The selection will be made according to the relevance of the applications
- Selection will be closed as soon as the quota is reached
- The number of participants will be limited to **15 STUDENTS**

DEADLINE :

- Applications are open until **AUGUST 10, 2023**, or until the quota is reached

COST :

Participation is **FREE OF CHARGE**.

In addition, the organization will take charge of the cost of

- Travel (within mainland Europe) and accommodation
- Breakfasts and lunches (dinners are not included)
- Overseas traveling can be financed up to a limit of **4 STUDENTS**, on a first-come, first-served basis.
